SUMMARY

- Responsible and highly dedicated individual with real-life working experience in dynamic environment entrusted with fulfilling leadership roles.
- High aptitude for coding and adaptability to multiple languages that translates to strong academic performance.
- Practical experience in fast-paced professional setting requiring excellent organization coupled with effective communication skills to accomplish challenging tasks.

SKILLS

Languages: Bash/Shell, C, C#, CSS, HTML, Java, JavaFX, JavaScript, PHP, Python, SQL

Software: Amazon Web Services, Azure Data Studio, Cisco Packet Tracer, Eclipse, Figma, GitHub, IntelliJ, JIRA, McAfee, Microsoft Active Directory, Microsoft Azure, Microsoft Office, MongoDB, NetBeans, NetSuite, Oracle, Scene Builder, ServiceNow, Talend, Visual Paradigm, Unity, Visual Studio Code, Wireshark

Frameworks: Angular, ASP.NET Core, Flutter, Jetpack Compose, JUnit, React, Spring Boot

Operating Systems: Android, iOS, Linux/Unix, MacOS, Ubuntu, Windows

EDUCATION

Sheridan College – Computer Systems Technology, Brampton ON

(January 2023 – April 2026)

- Cumulative GPA: 3.99/4.0
- Software Development and Network Engineering
- Doug Waechter Memorial Award for exceptional academic performance with a GPA of 3.99/4.00

University of Toronto - Honors Bachelor of Science, Toronto ON

- Major: Health Science Biology, and Psychology specializing in Neurobiology
- Dean's List Scholar, Graduation with Distinction

PROJECTS

Capstone – "Therapeia" VR Therapy mobile and VR app

(January 2025 – Present)

- Leading the development of an interactive virtual reality therapy platform, overseeing the overall framework, unit testing, and design implementation to ensure a seamless user experience.
- Optimized 3D environment by integrating interactive features, providing greater control and personalization for both clients and therapists.
- Utilized Unity, C#, Flutter, Spring Boot, GitHub, .NET framework, and Visual Studio to build an immersive and cost-effective solution for virtual therapy.

Object Oriented Program 2 Java - Cookbook Mobile App

(July 2024 – August 2024)

- Produced a recipe book organization app as a group – team lead, generated framework, visual design, and interactive elements.
- Enabled importing and saving recipes to/from a text document, ensuring easy data management and updates.
- Developed using Java, JavaFX, Visual Studios, and Scene Builder while integrating MVC design patterns.

University of Toronto - Photagenix "Diffquest"

(September 2024 – Present)

- Developed software to be shipped with scientific instrument that manages hardware controls for assays and signal input in the form of converting raw electronic signals from sensors into quantifiable graphical data.
- Integrated user interface and data visualization tools for the software, which resulted in enhanced user experience and easier interpretation of scientific data.
- Used the following technologies such as Raspberry Pi, C, Arduino, C++, HTML, CSS, JavaScript, Angular, PL/SQL, Oracle and Talend to control and operate databases.

WORK EXPERIENCE

Quality Assurance Analyst

(May 2025 – Present)

Lucky VR, Toronto ON

- Conducted functional, regression, and exploratory testing for immersive VR casino games developed in Unity, ensuring quality and stability across multiple gameplay scenarios.
- Performed cross-platform testing on leading VR headsets, including Meta Quest, and Oculus Rift, identifying hardware-specific bugs and optimizing user experience.
- Authored and executed detailed test cases and bug reports using JIRA and Testpad, contributing to structured QA workflows and thorough issue tracking.
- Collaborated closely with developers and designers to troubleshoot Unity-based issues, verify game logic, and validate performance across different build versions.
- Participated in agile ceremonies such as daily stand-ups and sprint reviews, promoting clear communication and quick turnaround on identified defects.

Technology Support Specialist I

(September 2024 – April 2025)

PointClickCare, Toronto ON

- Diagnosed and resolved hardware/software issues via ticketing system, improving system reliability and boosting user satisfaction by 25–30%.
- Played a key role in company-wide Windows 11 migration, supporting 1,000+ users with upgrades, compatibility testing, and scripted automation for streamlined deployment.
- Developed custom PowerShell scripts to automate software installations and system configurations, reducing manual workload and error rates.
- Delivered multi-channel tech support (phone, email, chat, in-person) at the in-office IT bar, ensuring timely resolution of Tier 1 & 2 technical issues.
- Collaborated with cross-functional teams to create technical documentation and user training materials, enhancing onboarding and system adoption.

Veterinary Assistant, Customer Service Administrator

(February 2019 – March 2021)

Front Street Animal Hospital, Toronto ON

- Facilitated client communication and scheduling through email, phone, and SNS; resolved payment and service-related inquiries efficiently.
- Oversaw health and safety inspections, ensuring compliance with cleanliness and operational standards.
- Managed inventory, supply orders, and monthly sales reporting, supporting both clinic operations and client needs.

VOLUNTEER EXPERIENCE

Hackville Participant (Hackathon)

(January 2025)

Sheridan College – Davis Campus, Brampton ON

- Participated in Hackville, a 36-hour hackathon hosted by Sheridan College, collaborating with a cross-functional team to tackle real-world challenges through innovative software solutions.
- Designed and developed “Therapeia”, a mental health VR app aimed at supporting emotional well-being, using Flutter for the frontend and Spring Boot for the backend API services.
- Applied agile development principles under time constraints, enhancing skills in rapid prototyping, cross-platform development, and teamwork in a high-pressure environment.

Google Developer Group Member

(February 2023 - Present)

Sheridan College – Davis Campus, Brampton ON

- Active member of the Google Developer Group (GDG) On Campus, participating in technical workshops, peer-led sessions, and collaborative projects focused on Google technologies such as Firebase, Flutter, and Cloud.
- Contributed to community-driven initiatives and hackathons aimed at building tech solutions for local businesses and social impact, fostering hands-on learning and innovation.
- Expanded technical expertise and soft skills through collaborative learning, mentorship, and networking with fellow developers and industry professionals.
